A video player interface is shown on the left. It features a large central video area with a black border. At the bottom, there is a horizontal timeline represented by a grey bar with several colored circular markers (purple, green, orange, purple) indicating different points in the video. To the left of the timeline is a circular play button icon with a triangle pointing right. To the right of the timeline are volume and settings icons.

A large video player interface occupies the left side of the screen. It features a top bar with a speech bubble icon. Below this is a large empty video frame. At the bottom, there is a horizontal timeline represented by a grey bar with several colored circular markers (purple, green, orange, purple, green, purple) indicating specific points in the video. A play button icon is located at the far left of the timeline. To the right of the timeline are volume and settings icons.

A large video player interface occupies the left side of the screen. It features a top bar with a speech bubble icon. Below this is a large empty video frame. At the bottom, there is a horizontal timeline with five colored circular markers (purple, green, orange, green, purple) positioned at different points along a grey bar. To the left of the timeline is a play button icon (a triangle inside a circle). To the right are volume and full-screen icons.
